SKILLS/LANGUAGES/TOOLS

JavaScript   Ruby   HTML/CSS   Ruby on Rails   ExpressJS   JSON   GitHub   MongoDB   jQuery
PostgreSQL   NodeJS   Ajax   SQL   RESTful API   Materialize   Bootstrap

EXPIERIENCE

Individual Projects:

PhotoGallery – A photo gallery for artists to show off work. Ruby on Rails app incorporating Rails Admin, ImageMagick, Paperclip, and Materialize.

Game of Thrones API – A place to find all the latest info on GoT React Front end with a Ruby backend.

Group Projects:

Wayfarer – The goal of this project is to develop a travel community for users to share
city-specific tips ("posts") about their favorite locations around the world.
MERN (mongoose, express, react, and node) Stack, helped set up components
and routes

HYUP – Hyup is multi-page webapp that aims to connect new or existing residents of San Francisco with Landlords that have housing available around the city. Ruby on Rails, set up rspec testing and validation

Watch Your Step – Watch Your Step is an app built to solve the issue of what is going on between you and your destination foot traffic wise. This app allows people to post about objects or events that are potentially blocking a sidewalk. MEN Stack, helped build routes and API.
